

6512-11

65. (Amended) The capsule according to claim 64, wherein the sequestering agent is selected from the group consisting of ethylenediaminetetraacetic acid, citric acid, their respective salts and combinations thereof.

REMARKS

In response to the Office Action of July 27, 2005, Claims 63-65 have been rewritten in the form suggested by the Examiner to incorporate the limitations of the base claim and intervening claims with additional corrections for misspellings as noted. A Terminal Disclaimer is also being submitted herewith.

It is noted that Claims 1-62 and 66-81 are being reviewed for additional patentable subject matter and a Continuation of this current application will be filed as a separate Continuation case with a new set of claims for additional subject matter.

It is respectfully submitted that the objections have been overcome for the reasons explained above and on the basis of the Amendment listed herein. An early Notice of Allowability is respectfully requested.

It is noted that comments on rejections listed in the Office Action of July 27, 2005, for Claims 57-61, 67-71 and 73-81 will not be addressed at this time since Claims 63-65 are not rejected. The applicants through their attorney reserve the right to make further comments in the Continuation case to be filed later and no admissions should be inferred from this Response.

6512-11

Should the Examiner have any questions or comments concerning the above, the Examiner is respectfully invited to contact the undersigned attorney at the number listed below.

Respectfully submitted,

Rosemary M. Miano  
Attorney for Applicants
